

ROBIN DATA PROTECTION OFFICER

PROFILE

Robin is an experienced Data Protection Officer (DPO) with a strong background leading privacy teams and delivering practical, risk-based compliance solutions. With experience across both Public and Private sectors, he helps organisations implement effective data protection processes that align with operational and strategic objectives.

A skilled communicator and problem solver, Robin combines meticulous attention to detail with a pragmatic approach to process improvement. His experience managing complex incidents, advising senior stakeholders, and delivering governance frameworks enables him to support organisations across a wide range of industries.

SAMPLE EXPERIENCE

As Data Protection Officer for a leading healthcare regulator, Robin was responsible for organisation-wide data protection compliance. He developed policies and procedures, managed breach response governance, risk assessments, Data Protection Impact Assessments (DPIAs), Data Subject Access Request (DSAR) responses, and data sharing agreements. He also implemented Privacy by Design principles and overhauled records management processes to support ongoing compliance.

Previously, Robin worked as a Business Operations Manager within an information governance consultancy, acting as DPO for several organisations, including a large NHS Integrated Care Board. He provided specialist advice across the Healthcare sector, managed incident responses, and led a team of data protection advisors. He also supported ISO 27001 and Cyber Essentials accreditations and delivered training to strengthen organisational governance.
