

# PAWEL DATA PROTECTION OFFICER LIFE SCIENCES

## PROFILE

Pawel is an accomplished Data Protection Officer with over 20 years' experience delivering strategic privacy leadership across global organisations. He combines a collaborative approach with deep expertise in personal data governance, enterprise risk management, and privacy programme development, helping organisations navigate evolving technological and regulatory challenges.

Specialising in Life Sciences, including clinical trials and research environments, Pawel helps organisations navigate complex regulatory requirements and implement risk-based compliance strategies. His in-depth knowledge of the Clinical Trials Regulation and its interaction with the GDPR led him to contribute to industry guidance supporting the practical application of data protection requirements within clinical research.

## SAMPLE EXPERIENCE

As Group Data Protection Officer and EMEA Privacy Compliance Manager for a global Financial Services firm, Pawel was responsible for overseeing company-wide compliance with the GDPR and jurisdiction-specific privacy laws. In addition to leading a team of privacy professionals, he advised senior stakeholders on regulatory requirements, supported audit and compliance testing programmes, managed privacy risk assessments, and oversaw regulatory change initiatives.

Previously, as Privacy Internal Controls Framework Director within a multinational pharmaceutical company, Pawel helped shape the organisation's global data protection strategy. He collaborated with privacy, cybersecurity, and digital teams to implement privacy controls, developed comprehensive standards, and supported risk oversight and compliance reporting across the business.
