- ✓ Ownership Control Access and Possession (OCAP) Certification

SAMPLE EXPERIENCE

As Director of Privacy and AI Governance for a transport agency, Angelique developed a comprehensive privacy programme that integrated data protection into core business processes. She was responsible for risk assessment, incident management, compliance monitoring, and staff privacy training. Angelique also established and managed the agency's first AI governance framework.

Working as a Chief Privacy Officer within the Healthcare sector, Angelique ensured the organisation exceeded privacy requirements. She established a Data Governance Committee, directed privacy and health information management projects, and provided subject matter expertise to Healthcare professionals.

As an independent consultant, Angelique has advised on complex digital projects, including digital identity, SaaS, and AI machine learning.
