PROFILE

Chris is an accomplished Data Protection Officer with more than 21 years' experience. He is particularly skilled in handling and processing sensitive medical records within operational environments and has successfully managed data protection programmes for multiple international companies within the Life Sciences sector.

Chris is known for his exceptional problem-solving skills and his ability to improve service delivery, whilst consistently meeting company goals. He offers practical, risk-based guidance that empowers organisations to navigate complex challenges.

His career also includes experience as a HART Paramedic with the South Western Ambulance Service and a Flight Operations specialist in the Royal Air Force, showcasing his diverse expertise and commitment to high standards of attainment.

QUALIFICATIONS

- ✓ CIPM
- ✓ GDPR Foundation Course
- ✓ Postgraduate Certificate in Data Protection and Information Rights Law

SAMPLE EXPERIENCE

Chris acts as the primary Data Protection Officer for multiple Life Sciences organisations, developing compliance frameworks for data protection legislation around the globe. He specialises in compliance audits and risk mitigation for medical healthcare companies.

Previously, Chris was the Group DPO and Information Governance Lead for a leading forensic healthcare specialist. He was responsible for implementing and monitoring procedures to ensure compliance with key regulations and provided strategic oversight across a network of companies, anticipating future legislation and mitigating risks.

Chris also helped implement new custodial Electronic Patient Record systems and fostered a culture of information assurance by delivering GDPR training to ensure staff were educated and compliant with the Data Security and Protection Toolkit (DPST).
