PROFILE

Ilkin is a business-driven and technically literate data protection professional with almost a decade of experience. His expertise spans a range of industries, especially the Finance and AdTech sectors, where he uses his expert knowledge to advise clients on a range of privacy concerns and risk management issues.

Ilkin is an exceptional communicator, and his infectious enthusiasm enables him to quickly develop and maintain strong working relationships with clients. He is highly experienced in working with international organisations and has in-depth expertise in drafting and negotiating legally binding documents related to data protection, in line with business needs and objectives.

QUALIFICATIONS

- ✓ CIPP/E
- ✓ Artificial Intelligence Governance Professional Training
- ✓ MSc in Information Technologies
- ✓ Bachelor of Laws (LL.B.)

SAMPLE EXPERIENCE

Ilkin acts as a primary DPO for a number of international organisations in the Technology and Software industry. Working with a Chinese EdTech company, he has built a thorough understanding of China's Personal Information Protection Law (PIPL). He ensures their global application adheres to strict, multi-jurisdictional regulations regarding sensitive data processing, parental consent, and international data transfers.

Ilkin previously worked as a Privacy Analyst for an AdTech company, specialising in the General Data Protection Regulation (GDPR). He was responsible for investigating data breaches, risk management, and implementing mitigation measures. He built expertise in age verification, crypto assets, and mobile and website compliance across different operating systems.
