- ✓ Cybersecurity
- ✓ Financial Sector
- ✓ FinTech

LANGUAGES

- ✓ English

PROFILE

Shane is a certified GDPR Practitioner with extensive experience in developing, implementing, and auditing data protection frameworks and programmes for the Financial Services sector and a diverse range of other industries. As Tech and Security Sector Lead, Shane applies his in-depth knowledge to address network security challenges, Cloud infrastructure, SaaS, DRaaS, application security, and IT vendor management.

Shane has served as a Data Protection Officer (DPO) for multiple organisations in a variety of industry sectors, where he has taken a proactive approach to promoting a data protection awareness culture. He has a particular interest in risk management, especially in combatting unauthorised access, viruses, and mitigating a wide range of vulnerabilities and threats.

QUALIFICATIONS

- ✓ GDPR Practitioner Certificate
- ✓ BA (Hons) in Business and Law, De Montfort University

SAMPLE EXPERIENCE

Shane has extensive experience in the Finance and FinTech sectors, providing guidance on the development and deployment of machine learning models. He ensures AI systems are designed with a focus on privacy and data protection and has assisted in the implementation of AI tools across helpdesks and customer service teams.

Working in a range of sectors from logistics to healthcare, Shane has helped organisations prepare for certification audits, including Cyber Essentials, ISO 27001, and Data Security and Protection Toolkit (DSPT). His detailed gap analyses and action plans have been instrumental in helping companies achieve certification readiness.

As a consultant for a global digital communications partner, Shane delivered in-house counsel on Standard Contractual Clauses (SCCs) and data sharing agreements. He also developed a comprehensive data protection training and awareness programme for employees.
