PROFILE

Joanna is a CIPM and OneTrust Privacy Automation-certified data protection professional. She is skilled in establishing, maintaining, and managing privacy programmes throughout their lifecycle within global organisations.

With experience supporting data protection compliance across multiple jurisdictions, Joanna combines strong project coordination with a deep understanding of privacy operations. Her knowledge of compliance monitoring and privacy technology, coupled with strong training skills, supports the effective implementation of data protection frameworks.

- ✓ CIPM
- ✓ OneTrust Privacy Automation Deployment Certification

SAMPLE EXPERIENCE

As a Privacy Project Associate and Privacy Compliance Analyst for a global asset management company, Joanna supported the organisation's company-wide privacy function and oversaw the implementation and management of its privacy programme across APAC. She coordinated compliance monitoring activities, supported comparative privacy controls analysis using AI tools, and provided specialist support for OneTrust.

Joanna also managed internal privacy projects, including a data protection awareness campaign reaching 10,000 employees, and developed and delivered tailored training content. Her role included supporting senior-level privacy reporting and communicating key updates to the Board.

Previously, as Data Protection Administrator for the same organisation, Joanna helped establish a new privacy team and supported data subject rights requests across EMEA. She also handled CCPA 'do not sell' requests and contributed to privacy compliance projects covering Thailand and the Cayman Islands, building a strong foundation in global data protection.
