

ELVIN

DATA PROTECTION SUPPORT OFFICER

LANGUAGES

- ✓ English

PROFILE

Elvin is an experienced cybersecurity professional with a strong background in vulnerability management, threat monitoring, and information security governance. He holds CISCO CyberOps Associate and Network Security certifications and has practical knowledge of Cyber Essentials and ISO 27001.

His analytical approach and experience working within complex technology environments enable him to assess risk, manage sensitive information, and support effective compliance processes. As a DPSO, he applies these skills to the accurate and timely handling of Data Subject Access Requests (DSARs).

QUALIFICATIONS

- ✓ CyberOps Associate, CISCO
- ✓ Network Security, CISCO

SAMPLE EXPERIENCE

As a Data Protection Support Officer (DPSO), Elvin assists with the delivery of DSARs for clients across a range of sectors. He reviews and prepares information for disclosure, applying necessary redactions and helping to ensure requests are completed accurately and within required timeframes. Elvin also supports the wider DPO team with data protection activities and client deliverables.

Previously, as a Cyber Security Administrator within the Education sector, Elvin supported security operations across more than 7,000 devices. His responsibilities included monitoring and assessing security risks, coordinating vulnerability remediation, supporting governance and policy compliance, and producing cybersecurity reports for senior stakeholders.
