PROFILE

Gloria brings a strong background in risk analysis, regulatory compliance, and business operations across international organisations. With experience spanning the Pharmaceutical, Biotechnology, and Financial sectors, she has developed excellent analytical skills and a thorough understanding of corporate governance processes.

Her meticulous approach and ability to manage complex information enable her to identify potential risks, maintain data accuracy, and support effective decision-making. Working collaboratively with cross-functional teams, Gloria applies her problem-solving and organisational skills to deliver reliable support in highly regulated environments.

QUALIFICATIONS

- MSc in Medical Biotechnology

SAMPLE EXPERIENCE

As a Data Protection Coordinator – Life Sciences, Gloria works alongside our DPOs to support clients across the sector. She assists with data protection compliance audits, preparing reports with actionable recommendations and implementation strategies. She also supports the review of Records of Processing Activities (RoPAs), Data Processing Agreements (DPAs), and Data Protection Impact Assessments (DPIAs), and advises on international data transfers and their associated assessments.

Previously a Risk Analyst Associate at a global professional services firm, Gloria supported risk, compliance, and due diligence activities for multinational clients. She reviewed complex corporate structures, analysed large datasets, and verified information against official records to ensure accuracy and consistency. Working with cross-functional teams, she identified potential compliance risks and supported Know Your Customer (KYC) and Anti-Money Laundering (AML) processes.
