PROFILE

Richie is an accomplished data protection and AI governance professional with almost 20 years' experience across consultancy and industry roles. He has a proven track record of developing governance frameworks and leading complex compliance programmes for multinational organisations.

With extensive experience in strategic privacy leadership, Richie specialises in translating regulatory requirements into practical, risk-based governance. His expertise spans Privacy by Design, AI governance, international privacy compliance, and data integrity, enabling organisations to embed responsible data practices throughout complex operations.

SAMPLE EXPERIENCE

As an independent privacy consultant, Richie provided strategic and operational compliance support to global organisations. For a multinational energy company, he led global DPO activities, engaged with EU supervisory authorities, and drove the implementation of a data integrity governance programme.

Previously, as Group Privacy Officer and DPO for a global eCommerce business, Richie developed risk-based data protection and AI governance strategies. He embedded Privacy by Design across the organisation, led successful ISO 27701 re-certification, and performed DPO responsibilities across multiple jurisdictions, including regulatory engagement.
